## Bringing Quality Bulk Trucking Services to Tulsa, Oklahoma

In our effort to meet our customers' growing need for reliable regional bulk trucking service, Plastic Express is pleased to announce the opening of our new terminal in Tulsa, Oklahoma. The new facility commenced operations on October 1, 2006, and brings our "Can Do" attitude and exceptional service model to companies needing bulk trucking within a 300 mile radius of the Tulsa area. Plastic Express has already begun to service one customer from the new terminal and there are now two others that have shown a very strong interest in directing railcars into the area as well.

## Plastic Express Recipient of California Trucking Association Fleet Safety Award

Saturday Night, September 30th, 2006 was a rewarding night for the employees of Plastic Express. After a great year of safe driving, and while providing outstanding customer service both in intra- and interstate service (over 1.2 million miles), the company's fine safety program was duly recognized by the California Trucking Association (CTA) in a statewide competition in which hundreds of transportation companies were entered. Plastic Express was awarded 1st Place for Safety in the Tanker and Vacuum Truck Division for calendar year 2005. According to the judges at CTA, this year's competition was the most intense ever. The competition allows for a 1st, 2nd and 3rd place award in about nine categories.

## Bringing Quality to Tulsa (continued)

The new Tulsa terminal is a direct result of input from customers. Over the past several months, we have been asked to investigate opening facilities in locations throughout the United States where our customers have bulk trucking needs and were dissatisfied with the service they were receiving from other bulk trucking providers. These customers appreciate the business model that Plastic Express utilizes, giving them exceptional regional service and quality, especially at their key accounts where the bulk truck service provider is seen as "an extension of our sales force". It is this business model, emphasizing personalized service and a "Can Do" attitude that has fueled our growth in the 36+ years that we have been working for the plastics industry.

If you would like to learn more about our new Tulsa terminal, or if you have an area that you believe that our Plastic Express business model will help you to better serve your customers, please give us a call. Let us show what we "Can Do" for you!

## Services That Are All About Plastics

### Bulk Trucking

Plastic Express maintains a fleet of over 70 self-loading 1600 cu ft and larger lightweight J&L bulk trailers and new lightweight Freightliner tractors to meet your bulk trucking needs. Lightweight equipment means larger payloads for our customers. Courteous certified drivers are on call 24 hours a day for same day deliveries.

### Bulk Terminals

Plastic Express serves the West, Mid-West and East Coast from eight bulk terminals strategically located throughout the United States. Each bulk terminal offers railroad switching capabilities six days per week.

### Packaging & Warehousing

Plastic Express offers packaging in California and New Jersey. We utilize modern inventory handling and packaging systems to meet our customers' needs. A customized software program is developed for each customer to track the packaging process and update you on the status of your order.

## Fleet Safety Award (continued)

The judges look at accident rates per million miles, Biennial Terminal Inspection program findings (BIT Program), driver recognition programs, Department of Transportation (DOT) status, driver/company guidebooks, training programs and any other related safety program items of interest submitted for consideration.

Commissioner Mike Brown of the California Highway Patrol was the keynote speaker and commended all the evening's winners and attendees on their commitment to safe vehicle operation, good maintenance programs and outstanding customer service, all of which are made possible through well managed safety programs and continued driver support and participation.

Plastic Express has and always will pride itself on its quality equipment and dedicated drivers who are always available to provide whatever service is required in a safe and efficient manner. It is our policy to recognize the outstanding drivers of the quarter and of the year and to let them know their efforts are what keeps Plastic Express in the forefront of the industry, and keeps our customers coming back.

Plastic Express is already well on its way toward competition for calendar year 2006. Our commitment to safety and quality should keep us in good stead for next year's awards competition. Another 1st Place would be great and a further testimonial to a fine fleet, safely operated.

## Plastic Express Welcomes Tom McKellar to Our Management Team

Tom McKellar has been named General Manager of Operations at our City of Industry, California facility. In this new position Tom is in charge of trucking, warehousing and packaging at City of Industry. Additionally, he will oversee trucking operations at our locations in Arizona, Nevada, New Jersey, Minnesota, Illinois, and Oklahoma.

Tom's 30 years of work experience have been in trucking related businesses, holding various customer service intensive positions including managing partner of a large heavy truck dealership.

His most recent experience was running a regional bulk trucking and transloading company. Customers and suppliers can contact Tom at our City of Industry office: 626-336-8111; by cell phone: 714-906-9091; or email: tom.mckellar@plasticexpress.com.

Plastic Express continues to grow by providing consistently uncompromised service to our loyal customers. This starts with investments in additional people, equipment and facilities, which we confidently make to help our customers' businesses grow.

## Find Out More About Plastic Express

Plastic Express provides custom tailored logistical solutions to fit the needs of our customers. We handle only plastics produced in the U.S. and imports and exports. With our "one stop shop" distribution centers on both the east and west coasts, Plastic Express is committed to assure that our customer's resin handling challenges are met every day. For more information on our services or locations contact us today.
